MUSCHIK ET AL

DETAILED ACTION

Election/Restrictions

- Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-15, drawn to methods of making glass, classified in class 65, subclass 134.1.
 - II. Claims 16 and 17, drawn to a glassmaking plant, classified in class 65, subclass 346.
 - III. Claim 18, drawn to a method of making a stove, classified in class 126, subclass 273R.
 - Claims 19-20, drawn to a method of making glass articles, classified in class 126, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

- 2 Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either. (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)) In this case the apparatus as claimed can be used to bubble reducing gas through motion glass.
- 3 Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806 04, MPEP § 808 01). In the instant case the different

Application/Control Number 09/943,645 Art Unit 1731

inventions have different modes of operation: I is a glass making method and III is a stove making method.

- 4. Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. I has the effect of producing refined glass, IV has the effect of producing ceramized glass products.
- 5. Inventions I and III are unrelated Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions II functions to make glass, III functions to make a stove.
- 6. Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of openion, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. II functions to make glass, IV functions to make glass-ceramic
- 7. Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of personal, different functions, or different effects (MPEP § 806 04, MPEP § 808 01). In the instant case the different inventions have different effects. III has the effect of producing a stove, IV has the effect of producing a glass-ceramic article.

Art Unit: 1731

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper

- A telephone call was made to Steven Meijer on January 15, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
- Applicant is advised that the reply to this requirement to be complete must include an
 election of the invention to be examined even though the requirement be traversed (37 CFR
 1.143).
- 10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(b).
- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean B Vincent whose telephone number is 571-272-1194. The examiner can normally be reached on M - f (8:30 - 6:00)
- 12. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven P Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
- 13 Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-398-0651.
